

SUBMED **Product Range**

Who we are ?

SUBMED is a leading provider of high-quality medical products dedicated to enhancing patient care and supporting healthcare professionals. Founded in 2010 and headquartered in Istanbul/TURKEY, the company has been committed to delivering innovative medical supplies tailored to the needs of the healthcare sector.

SUBMED's extensive product range includes surgical packs, minor kits, dialysis fistula on/off kits, catheter on/off kits, dressings, catheter protection pouches, surgical gowns, equipment covers, disinfectant wipes, masks, and bonnets. Each product is designed with a focus on safety, comfort, and effectiveness, ensuring that healthcare providers have the essential tools they need for optimal patient care.

The company prides itself on its rigorous quality assurance processes, implementing stringent quality control measures throughout its manufacturing operations to ensure compliance with international standards. Regular testing and compliance checks reinforce SUBMED's reputation as a trusted provider in the medical market.

To maintain a competitive edge in the healthcare industry, SUBMED invests significantly in research and development. The R&D initiatives focus on innovating existing products and creating new solutions that address the evolving challenges faced by healthcare providers and patients. Collaboration with medical professionals allows for the gathering of valuable insights that inform product development.

With a strong market presence across Europe and exports to over 50 countries, SUBMED has established itself as a reliable supplier in the healthcare sector. The company is also committed to corporate social responsibility, engaging in initiatives aimed at improving health awareness and accessibility. This dedication reflects SUBMED's mission to contribute positively to the communities served and enhance global health outcomes.

Through an unwavering focus on quality, innovation, and customer satisfaction, SUBMED continues to make significant contributions to the healthcare industry, reinforcing its position as a reliable partner for healthcare providers and ultimately enhancing patient care and outcomes worldwide.

QUALITY

Our team makes an extraordinary commitment to provide high-quality, safety, and ease together so we are inspected and continuously monitored for several standards.

On our road to offer safest tailor-made solution in the easiest way possible, we succeeded in evaluations and comparisons performed by a wide variety of observers; including but not limited to government agencies, non-profit organizations, and our respected clients. This is how we meet and exceed customers', patients', and regulators' expectations of quality and safety.

CUSTOMER SERVICE

Our job begins before meeting our customers, continues while serving, supporting and developing products that can meet their requirements and goes on through after sales process. This is how we establish intimate and sustainable dialogues with our clients.

DISTRIBUTION

Our premises are located in Istanbul, at the heart of Euroasia, where we can enjoy several advantages of fast and flexible operations and take advantage of logistic benefits. Thus we are offering best possible delivery options, combined together with well-arranged production schedule.

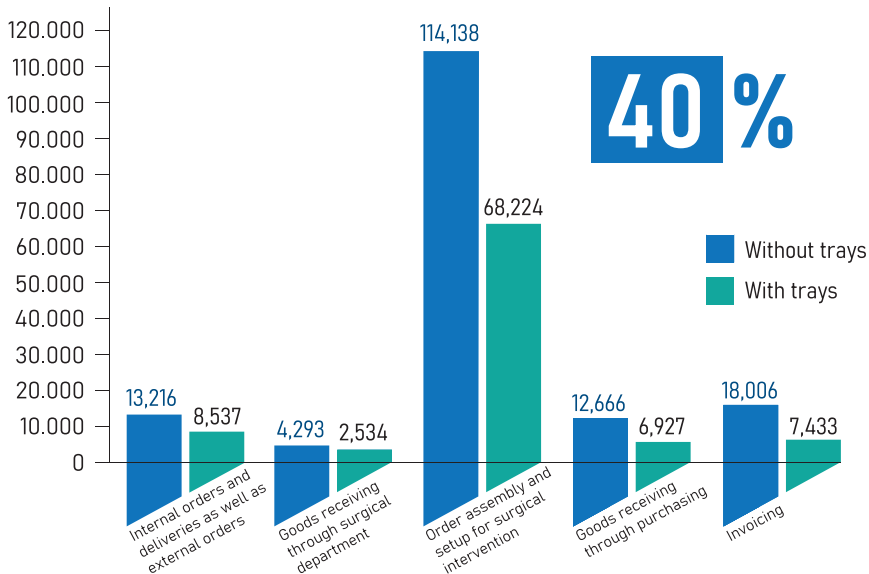

TAILOR-MADE SOLUTIONS AT YOUR SERVICE

Submed Drape, Submed Gown, Submed Kit, EASY HD, Submed Pack and Submed Surgical

Series procedure, drape and gown sets are specially designed for your operational needs in various operations. A broad range of selections are available from our predesigned sets, while we can also design sets according to your custom procedures. Each set is designed to offer safety for your patients and to make your process easier by saving time and money while increasing efficiency. SUBMED series of sets offer standardized procedures to medical professionals acting in various fields. It is safer, it is easier & it is especially designed for you..!

Comparison of total time with and without Procedure Sets (11 different types of trays in 2.785 interventions in total)

1. Prof. Dr. rer. oec. Dipl.-Soz. Päd. Michael Greiling
Managing Director of the Institute for Workflow Management in Healthcare (IWIG®) GmbH, Münster / Germany, AN-Institute of the University of Westphalia in Gelsenkirchen, Professor of Westphalian University Teaching Field Business Administration, esp. Workflow Management in Healthcare, Degree in business administration and qualified social science, received a doctorate in economics before consulting and scientifically supporting industrial companies on issues of innovation management, evolution management and quality management at the Institute for Applied Innovation Research at the Ruhr-University Bochum, Since 2000, Prof. Dr. rer. oec. Dipl.-Soz. Päd. Michael Greiling was responsible for controlling business of APB Management Consulting GmbH and member of the Leadership Conference of the Group Evangelical Trust / APB / BSU, Society of the Evangelical Church in Germany.

2. Institute for Workflow Management in Health Care (IWIG)

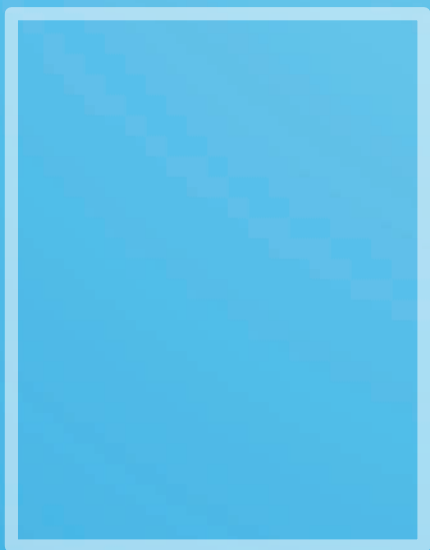

The scientific field of activity of the Institute for Workflow Management in Health Care (IWIG) is the continuous evolution of the content and methods- in all areas of a holistic concept

- for workflow management, The study area includes the research and marketable development of applicable operational procedures and methodologies on the subject of "processes" in health care, IWIG contributes knowledge since 2000 by consulting activities and academic research

Surgical

DRAPES COVERS GOWNS

In surgical procedures, hygiene and patient safety are top priorities. Submed meets these needs at the highest level by providing healthcare professionals with high-quality surgical drapes that ensure a sterile and safe working environment.

Safe Easy

Safe Easy

Surgical DRAPES and GOWNS

During surgical procedures, surgical drapes and gowns are essential materials used to minimize the risk of infection and protect both patients and healthcare personnel. These critical components of modern medicine ensure sterility and safety across a wide range of healthcare applications.

Surgical drapes are designed to maintain a sterile environment during procedures by protecting the surgical site and minimizing the risk of contamination. Available in various sizes and specifications, they isolate the operative field, ensuring safe and sterile conditions.

General Surgery: Drapes maintain a sterile field on the operating table, preventing the risk of infection.

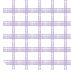

Orthopedic Surgery: Large-area drapes offer superior protection during prolonged procedures, thanks to their fluid-resistant properties.

Gynecological and Urological Procedures: Specially designed drapes with anatomical cutouts are optimized for delicate and precise procedures.

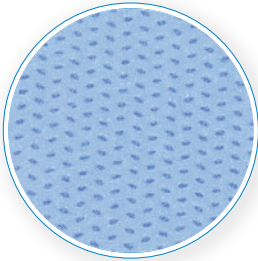

Surgical Gowns

Surgical gowns are worn by healthcare professionals to protect both themselves and the patient. Made from sterile, fluid-resistant materials, they prevent the spread of microorganisms during surgery.

Packaging TYPES

submed^{Safe Easy}

We use three different packaging methods due to ensuring the safe transportation, storage, and use of sterile medical products is a top priority for us. At Submed, we rely on Header Bag, Sterilization Pouch, and Thermoform Packaging to ensure that our surgical drapes and gowns meet the highest standards of hygiene and safety. Each packaging method not only preserves the sterility of our products but also others practicality, making your daily operations easier.

Safe Easy

Double Packaging

submed Safe Easy

Maximum Protection with Safe and Sterile Packaging

At Submed, we prioritize the hygiene and safety of our surgical drapes and gowns by utilizing the double packaging method. In this process, our products are first placed in clear bags to shield them from external factors, and then carefully packed into boxes. This additional layer ensures that the sterility of the products remains intact and that they reach you safely.

When necessary, we also include protective cardboard inserts within the boxes to secure the products during transport. This prevents movement and potential damage, ensuring that the products arrive in perfect condition. The double packaging method is crucial for maintaining product sterility, and at Submed, we meticulously manage every detail to ensure it.

In healthcare, hygiene and safety are paramount, and we ensure that our products are delivered to you in the safest way possible.

Safe Easy

Label Types

// SUBMED Color Coding System

SUBMED enhances organization in healthcare facilities by labeling its medical operation drape sets, drapes, kits, and procedure sets with color-coded tags based on product categories.

This color coding system simplifies storage and identification in medical centers, hospitals, and clinics. Additionally, customizable translations and customer logos can be added to the labels, offering tailored solutions for every client.

Surgical Microscope Covers

submed Safe Easy

In the realm of modern surgery, precision and cleanliness are paramount. The surgical microscope, a cornerstone of advanced surgical techniques, plays a critical role in ensuring meticulous visualization and accurate execution of complex procedures. To safeguard the functionality and longevity of these sophisticated instruments, the use of high-quality surgical microscope covers is essential.

SUBMED Surgical microscope covers are designed to protect these delicate and valuable tools from environmental contaminants, accidental damage, and wear during use and storage. Made from durable, non-reflective materials, these covers offer a barrier against dust, moisture, and other potential hazards that could compromise the integrity of the microscope.

GOWNS

Safe Easy

SUBMED surgical gowns deliver high-level protection with lasting comfort. Latex-free fabrics with targeted reinforcements. Breathable materials and ultrasonic-bonded sleeves enhance strength and comfort through long procedures.

Safe Easy

Surgical Gowns Safe Easy Protection

submed
Safe Easy

High performance with high comfort

All our surgical gowns offer operating theatre staff excellent comfort and ease of use. High-tech, breathable fabrics keep the wearer comfortable and dry, even during long procedures.

The gowns feature sleeves with ultrasonic bonding, which contribute to greater strength and comfort.

SUBMED's gown fabrics offer high-level protection. Each gown is latex-free. We offer different fabric options for surgical gowns, each with a special style, function, and reinforcement and meets or exceeds the minimum performance requirements of the EN 13795-1, EN 13795-2 standards.

The gowns materials have a good hydrostatic head, and the extra repellent treatment gives patients and healthcare professionals the protection they need.

Safe Easy

// Our products are designed with the utmost attention to ensuring both the comfort of medical staff and the well-being of patients. Every detail is crafted to allow healthcare workers to perform with maximum efficiency, saving valuable time during critical procedures. We understand that every second counts in the operating room, and our sets are developed with this in mind. By combining quality and safety, we aim to support both healthcare professionals and patients.

KITS

SUBMED specializes in the production of sterilized kits designed for minor surgical procedures and emergency interventions, providing practical and efficient solutions tailored to the needs of healthcare professionals. These kits are meticulously developed to optimize preparation processes, ensuring time efficiency and ease of use for medical staff.

Surgical Sterile Kits

submed
Safe Easy

// Efficiency and Cross-Contamination Control

Engineered to minimize preparation time, SUBMED kits enable prompt responses to medical situations. Their design prioritizes the prevention of cross-contamination, safeguarding patient health and upholding stringent hygiene standards.

Tailored Content and Customization

Each kit is thoughtfully assembled to include materials essential for specific procedures. The customizable nature of these kits ensures they can be adapted to the unique requirements of healthcare professionals, enhancing their practicality and versatility in diverse medical scenarios.

Advanced Packaging Solutions

SUBMED employs advanced packaging techniques, including double packaging, to maintain product sterility and integrity. A variety of packaging options are available to meet logistical and operational needs, ensuring both convenience and compliance with healthcare standards.

SUBMED's minor surgical procedure kits deliver reliable, high-quality solutions designed to support healthcare professionals in performing efficient and safe medical interventions.

EASY HD Fistula&Catheter On/Off Kits

// Enhancing Dialysis Experience with EASY HD Kits by SUBMED

We design, develop, and customize procedure kits specifically tailored for fistula and catheter therapies. EASY HD Kits produced according to nursing habits, procedural standards, and most importantly patient safety and comfort.

EASY HD Kits are comprehensive, containing all the necessary dressing materials and components for fistula and catheter connection & disconnection procedures. Beyond reduction infection risks, which is crucial in dialysis, EASY HD Kits brings several additional benefits:

- Ensuring standardization in clinical practice for fistula and catheter care
- Streamlined setup with intuitive, user-friendly design
- Reduced preparation time for healthcare staff
- Faster administration of dialysis treatments for improved workflow
- Superior materials engineered for reliability and durability
- Innovative product design to ensure consistent, high-quality, optimal dialysis treatment
- Reduced risk of complications or adverse events for patients
- Cost-effective storage processes and supply chain
- Minimized product waste and decrease in clinical waste
- Lowered overall dialysis operating costs for centers

Catheter Protection Pouch

// EASY HD Catheter Protection Pouch is a specialized dressing accessory designed to secure and protect dialysis catheters. Catheters need to be securely held in place to prevent complications such as infection, catheter dislodgement, or damage. The pouches are primarily used to enhance the comfort and security of catheter users and to prevent complications that can arise from catheter movement or accidental dislodgement.

Safe Easy

EASY HD

Catheter Protection Pouch

submed
Safe Easy

Material

Soft, comfortable, and breathable, hydrophobic medical grade fabric.

Comfort

Designed for comfort, especially if it is intended for long-term use.

Breathable

While it creates a barrier to external contaminants, it is also breathable, allowing oxygen pass through. This feature supports the body's natural wound healing processes and helps prevent maceration (softening of the skin due to excess moisture) around the exit side of catheter.

Security

The pouch securely holds the catheter in place to prevent dislodgement, which can cause pain and complications for the patient.

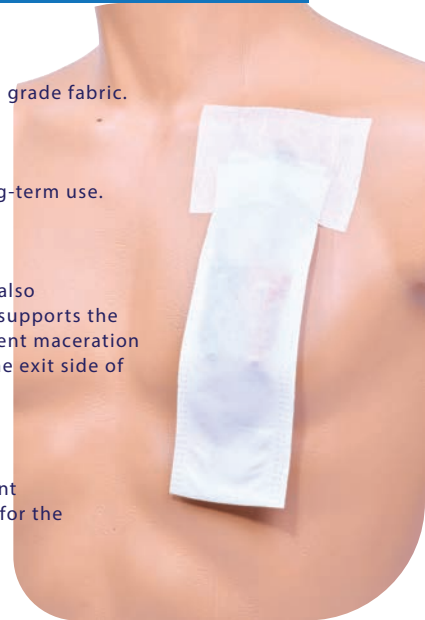

Compatibility

The pouch is compatible with the specific type of catheter being used.

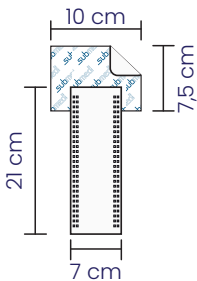

Customization

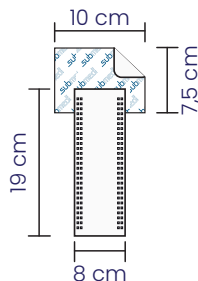

The pouches are available in various sizes and configurations to accommodate individual patient needs.

Catheter Shower Pouch

// EASY HD Catheter Shower Pouch is crucial for maintaining the hygiene and integrity of catheter sites, reducing the risk of infection or complications associated with moisture exposure.

It provides peace of mind to individuals who require catheters by allowing them to shower or bathe without the fear of damaging the catheter or causing infections. It serves the purpose of keeping the catheter site dry and preventing water from entering the catheter, which is especially important for individuals.

Catheter Shower Pouch

submed
Safe Easy

Waterproof Design

The pouch is made from waterproof material to create a barrier that shields the catheter from water.

Comfort and Skin Friendly Material

The pouch is made from comfortable, skin-friendly materials to minimize skin irritation or discomfort during use.

Secure Seal

A reliable and secure seal is essential to prevent water from getting inside the pouch and reaching the catheter site.

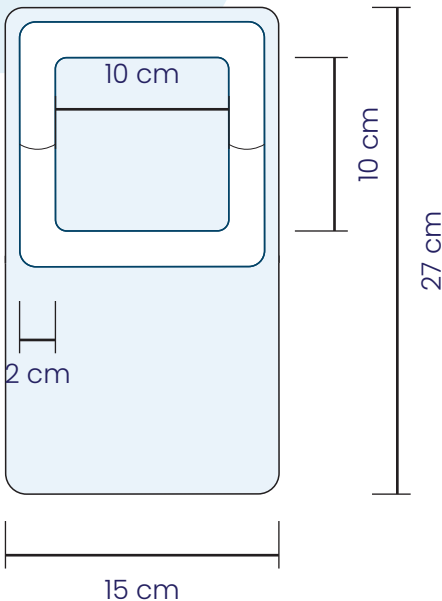

Latex-Free

Like many medical products, catheter shower pouches are often latex-free to reduce the risk of latex allergies or sensitivities.

Easy Application

They should be easy to put on and take off, even for individuals with limited mobility.

2% CHG Disinfectant Wipe

// Clinical trials focusing on patients with central intravenous devices have demonstrated the efficacy of chlorhexidine gluconate in alcohol in reducing the incidence of catheter-related infections.

Scientific evidences strongly support the use of 2% chlorhexidine gluconate (CHG) in 70% isopropyl alcohol (IPA) as an effective antiseptic in healthcare settings. This combination demonstrates broad-spectrum antimicrobial effectively targeting a wide range of microorganisms, including bacteria, fungi, and certain viruses. The synergistic effect of CHG and IPA enhances their antimicrobial action.

SUBMED 2% CHG Disinfectant Wipes, an expertly designed solution; exactly tailored to protect against infection risks during fistula and catheter care in dialysis.

2% CHG Disinfectant Wipe

// Fistula Care

✓ Pre-Dialysis Fistula Care

Before initiating dialysis, it is crucial to clean the area around the fistula site to minimize the risk of contamination into the bloodstream. Chlorexidine wipes are used to disinfect the skin surrounding the fistula site.

✓ Post-Dialysis Fistula Care

The use of %2 Chlorexidine Wipe after completing a dialysis session and needle removal, provides certain situations to help reduce the risk of infection and maintain the cleanliness of the fistula site.

Catheter Care

- ✓ **Catheter Exit Site Care:** Catheter exit site care involves cleaning and maintaining the area where the catheter exits the skin. The goal is to keep the skin around the exit site clean and free from bacteria and other microorganisms. 2% Chlorexidine is commonly used as an antiseptic for cleaning the catheter exit site in dressing change.

Safe Easy

Other Areas of Application

SUBMED 2% CHG Disinfectant Wipes are designed for various applications in healthcare and personal hygiene. Here are some other common usage areas for these wipes:

✓ Wound Care

When it comes to wound care, these wipes can be used to clean the skin surrounding the wound site. They help remove bacteria, dirt, and other contaminants, reducing the risk of infection and promoting proper wound healing.

✓ Injection Preparation

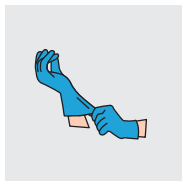

Prior to administering injections, it is essential to clean the injection site. The wipes can be used to cleanse and disinfect the area, creating a sterile environment and minimizing the risk of infection.

✓ Personal Hygiene

The wipes can also be used for general personal hygiene purposes. They are suitable for cleaning small areas of the skin, such as hands, before or after handling food, using public facilities, or engaging in activities where cleanliness is important.

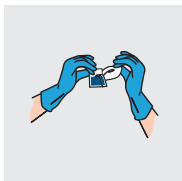

✓ Dressing and Plaster Removal

The wipes are particularly effective in cleaning the skin after the removal of dressings, plasters, or adhesive bandages. They help remove adhesive residue and disinfect the skin, preparing it for the application of new dressings.

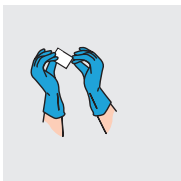

Ensure your hands are clean

Before using the skin wipes, it is important to wash your hands thoroughly with soap and water or use hand sanitizer to reduce the risk of introducing additional contaminants.

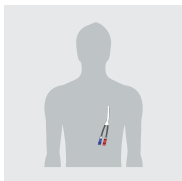

Open the individual wrap

Each wipe is typically individually wrapped to maintain its sterility. Open the packaging carefully to avoid contamination.

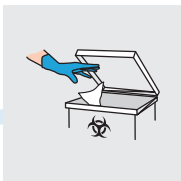

Unfold the wipe

Take out the wipe from the packaging and unfold it fully to expose the entire surface area.

Cleanse the desired area

Gently wipe the skin using the unfolded wipe, focusing on the specific area that requires cleaning. Apply gently pressure as needed, but avoid excessive scrubbing that may cause skin irritation.

Avoid contact with eyes and mucous membranes

It is important to avoid direct contact with the eyes or any sensitive mucous membranes while using these wipes. If accidental contact occurs, rinse thoroughly with water.

Custom Procedure PACK

// Custom Procedure Packs: Tailored for Precision and Efficiency

At SUBMED, we understand that every medical procedure is unique. That's why our Custom Procedure Packs (CPP) are meticulously designed to meet the specific needs of healthcare professionals, ensuring precision, efficiency, and optimal patient outcomes.

Why Choose SUBMED?

SUBMED is a trusted name in delivering innovative medical solutions. Our Custom Procedure Packs reflect our commitment to quality, sustainability, and customer-centric design. By integrating our industry-leading drapes and gowns into your CPPs, we ensure your team benefits from proven reliability and performance in every procedure.

Choose SUBMED Custom Procedure Packs: Precision tailored for your success.

Safe Easy

Benefits Of Custom Procedure PACK

submed
Safe Easy

// Key Features

Personalized Design: Each pack is custom-assembled to include the instruments, drapes, and components required for your procedures.

Market-Leading Materials: Incorporating SUBMED's high-performance drapes and gowns, rigorously tested for efficacy and durability.

Pack Optimization: Carefully configured to streamline workflow and minimize waste, ensuring you get exactly what you need without compromise.

Quality Assurance: Manufactured with premium, sterile components that adhere to the highest international standards for safety and performance.

Alignment with Your Goals: Designed in collaboration with your team to align perfectly with your clinical and operational objectives.

Benefits

Enhanced Patient Safety: Minimize the risk of infection with sterile, single-use packs.

Operational Efficiency: Reduce preparation time and eliminate unnecessary components for a smoother workflow.

Cost Control: Optimize procurement processes and manage inventory more effectively.

Tailored Excellence: From general surgery to specialty fields, our CPPs are fully customizable to meet your exact requirements.

// The IQ Program: Simplifying Tender Specifications and Set Management

At SUBMED, we have developed an internal program called IQ, designed to streamline the handling of customer tender specifications and requested set details. This program acts as a dynamic tool to ensure efficiency, accuracy, and collaboration across all relevant departments.

How IQ Works

The IQ program functions similarly to an online shopping website, where each item is carefully selected based on the customer's tender specifications or requested set details. With tens of thousands of items currently available in the database, the program ensures we can address diverse customer needs.

If an item is not already in the system, it can be created and added seamlessly. Once all required items are selected and placed in the "basket," the program generates a comprehensive technical data sheet. This sheet includes:

- Detailed technical specifications
- Product labels
- Boxing information

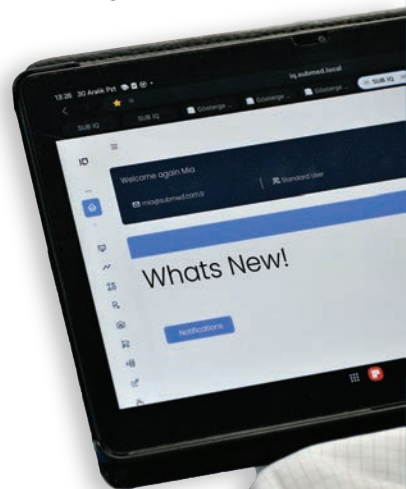

The technical data sheet is then sent to the customer for review and approval.

After Customer Approval

Once the customer approves the data sheet, all internal departments gain access to the finalized set details. This facilitates:

- Planning Department: Scheduling production and delivery timelines.
- Purchasing Department: Ordering necessary materials based on specific set requirements.
- Warehouse Department: Preparing and managing inventory for packing and shipping.

Safe Easy

Creating Interactive Packs

submed
Safe Easy

// Key Features of the IQ Program

1. **Comprehensive Database:** A vast, ever-expanding inventory of items to meet all customer needs.
2. **Customization:** Ability to create new items and integrate them into the system.
3. **Automation:** Generates detailed, accurate technical data sheets with minimal manual effort.
4. **Collaboration:** Ensures smooth communication between departments and with customers.

Benefits of the IQ Program

For Customers:

- Tailored solutions to meet their specific requirements.
- Clear and detailed communication through the technical data sheet.
- Faster approval process, saving time and ensuring satisfaction.

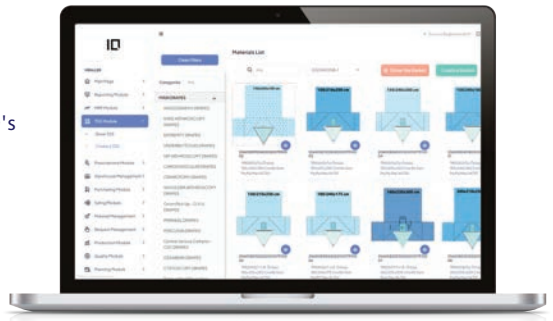

For SUBMED:

- Enhanced efficiency in handling tenders and creating sets.
- Streamlined workflows across planning, purchasing, and warehouse teams.
- Improved accuracy, reducing errors and rework.

A Program Built for Growth

The IQ program is designed with scalability in mind, capable of handling large databases and diverse customer requirements. It serves as a foundation for continuous improvement, with potential future enhancements such as AI-powered item suggestions and advanced analytics to provide deeper insights into customer preferences.

The IQ program is a testament to SUBMED's commitment to innovation, operational excellence, and customer satisfaction.

Safe Easy

Surgical Custom Procedure PACK

Step 01

We receive your technical specifications or tender requirements via email, and our expert team thoroughly reviews them in detail.

Suitable products are matched, content is created, and pricing is prepared using our state-of-the-art SUBMED IQ program.

Step 02

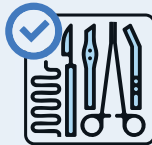

Step 03

We will quote the project, along with the technical data sheet and pricing for approval via email, and await your confirmation.

Once the TDS approval is received, a non-sterile or sterile sample is prepared and shipped based on preference.

Step 04

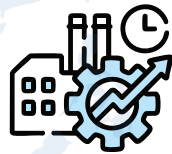

Step 05

After you approved samples, order will received from you.

Your order is forwarded to production. Production time varies between 4-6 weeks.

Step 06

Compagq Gloves Swabs

Engineered for consistency, the SUBMED Compaqq range delivers robust barrier protection, low fiber-shed absorbency, and skin-friendly, secure adhesion across a full range of sizes and sterile/non-sterile options.
